on your Data

4 BENEFITS

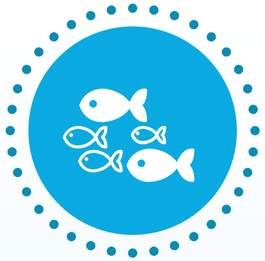
aquaTracker

Cloud-Based system for Aquaculture Production Management

The Choice is Yours!

Easy to Use

Use mobile phones and tablets.
Eliminate paperwork & administration effort.



Your production... is in your pocket!

Access real-time, updated information from any place you go, using any device!

Complete Traceability Made Easy

Follow your fish from input to harvest and Know which types of feed, feed batches or medicines have been used.

Get Value from your Data

powerful reports and stunning visualizations help you to identify problems or trends, reasons for poor performance and areas for improvement.

And very important...
it is Not Expensive!

The return on investment is immediate!
